

# Internet Based WEL Client

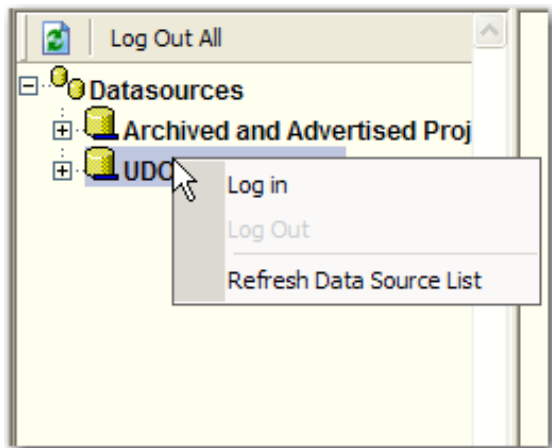

1. The UDOT ProjectWise can be accessed via the Internet through a normal Web browser. The application is the “Web Explorer Lite (WEL)”. *It will download a few files and you need to allow popups and have ActiveX enabled the files will be installed once.* To access the Internet based WEL client use the following URL:

<http://pw.udot.utah.gov/WEL/index.html>

2.The first screen you see well be this one:

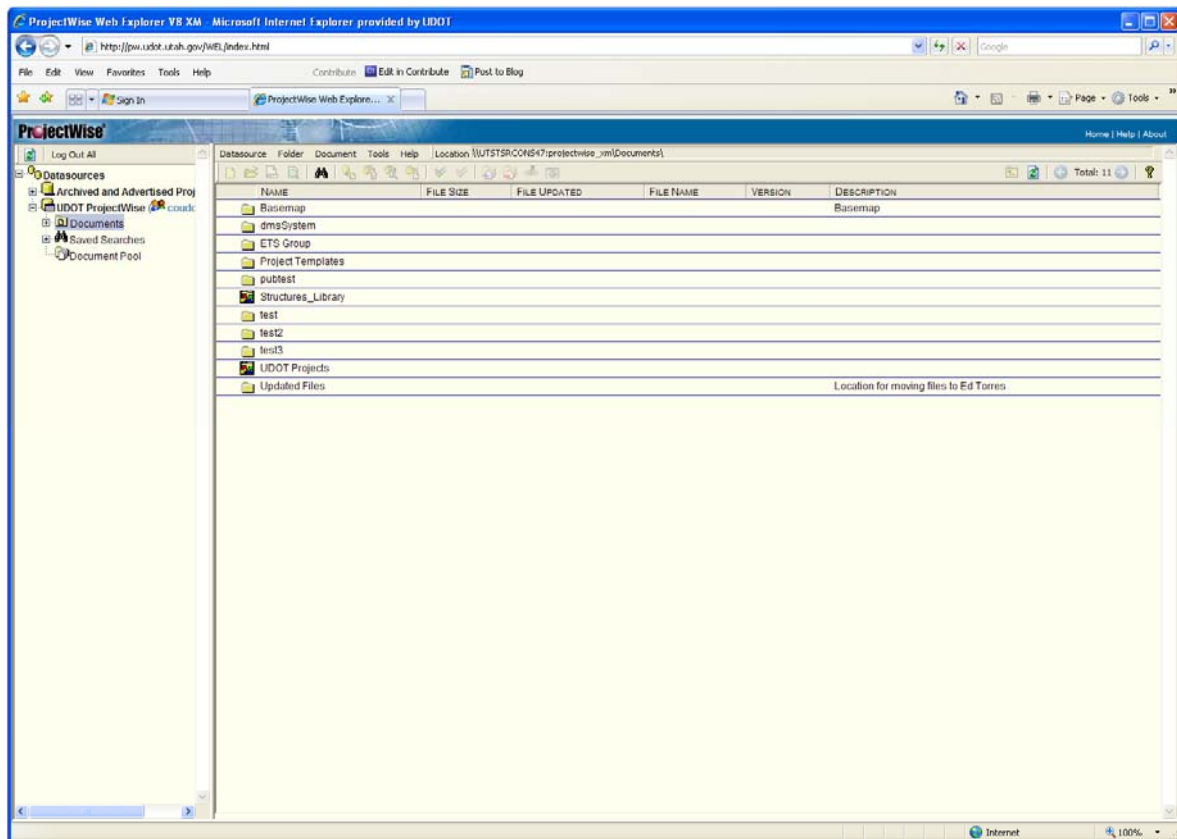

3. To log into the session right-click on the UDOT Projectwise folder and left-click Log in from the small pop-up menu:

4. The database login screen will appear and you will use your domain\username see example below for the regions it will be r#udot\username. The domains for each location are coudot, r1udot, r2udot, r3udot and r4udot. The username and password are the same as you use to log onto the network and workstation.

The screenshot shows the 'ProjectWise' application window. On the left is a tree view with 'Log Out All', 'Datasources', 'Archived and Advertised Proj', and 'UDOT ProjectWise'. The main area is titled 'Datasource Log In'. It contains three input fields: 'Datasource:' with 'UDOT ProjectWise' selected, 'User Name:' with 'coudot\gwilliams', and 'Password:' with masked characters. Below these are 'Log in' and 'Cancel' buttons. At the bottom is a 'Remember Me' checkbox.

5. Once logged in it will look like this and you will be able to navigate and do what you need to do:

6. If you need documentation, please refer to the online help file, available by clicking on the “help” icon in the right-hand panel of the Web Explorer Lite window. Clicking on this link will call up the Web Explorer Lite Help file, which should be able to answer most of your questions.
